Needs and Solutions

- Storing past test runs to allow for comparing to newer ones
  - Store past test runs in an SQLite database and display them in an organized manner through use of html and JavaScript formatting

- A way to make test runs easily replicable
  - Create "Profiles" for test runs to load up and run with buttons to select more than one test case at a time

- Code that allows for growth
  - Rewrite current GUI to allow for more scalable additions in the future by simplifying the code and making it less specific

- A way to access and change specific parts of test cases
  - An intuitive GUI that allows you to reach any kind of data you need to look at with Code that won't break when you try and change things
